*Combining Standard Aero's World Best capabilities with the dedicated; regional based Customer relationship management provided by **Energy Aerospace** will ensure you enjoy standards of service previously unobtainable in the maintenance environment*

T56 / 501D Repair Experts – For over 40 years Standard Aero has been providing support of the Rolls-Royce Allison T56 / 501 family of engines. Standard Aero has grown to serve the largest and most diverse group of T56 / 501 customers in the aerospace industry. This unprecedented depth of experience and the unique diversity of operational environments combined with the highest technical standards demanded by discerning customers simply means that Standard Aero is now responsible for the depot-level maintenance of over half of the operational T56 / 501D engines worldwide.

Unparalleled Customer Support – When you need fast troubleshooting or emergency support EAC's regionally based "rapid response" backed by Standard Aero's customer support team is available to you 24 hours a day, 7 days a week. From our Regional locations in the U.A.E. and the U.K. **Energy Aerospace** will arrange the supply of Field Service Representatives quickly and effectively. The focused attention to your needs provided by **Energy Aerospace** during the maintenance process ensures our own product experts assist you to make optimum maintenance decisions with ease and confidence. The net result is that you concentrate on your primary business of operating the aircraft while **Energy Aerospace** takes care of every aspect of the MRO process on your behalf.

Firewall-Forward Support and More - Along with Standard Aero's World Best quality T56 / 501D repair and overhaul programs, the wide range of services managed by **Energy Aerospace** offers the most comprehensive QECU, airframe accessory, 54H60 propeller and APU support. Our total service goes beyond repair and overhaul by offering custom support solutions tailored to customer needs. **Energy Aerospace** will evaluate your entire propulsion system needs and recommend fleet maintenance activities that will increase your time between overhauls, provide custom tailored training programs, logistics and export support optimizing utilization and dramatically reducing life cycle costs.
